Note: Fastenings are not supplied for the Wall Mount Bracket.

All sizings and conversions are +/- 2.5mm / 1/16" and are subject to change without notice. We recommend commerical installations use metric measurement for any umbrella spacing to ensure accuracy. The above dimensions make the assumption that you have installed your umbrella at the recommended installation height on your wall. If you have installed your retreat lower or higher than recommended ,you will need to add that difference to the above measurements.
