

CUSTOM SHADE STRUCTURES

When it comes to Custom Shade Structures, Shadeform have over 30 years of industry experience in the design, manufacture and installation of a wide range of unique and individual shade solutions.

PROJECT MANAGEMENT - Shadeform has the experience to oversee, monitor & deliver your custom shade project efficiently and with scrupulous attention to detail. From start to finish, your project is in safe hands.

DESIGN - Shadeform have a designated 3D design department capable of providing conceptual & detailed Shade designs. Development approvals, shading diagrams, visualisations and shop drawings can all be undertaken by our in-house design team.

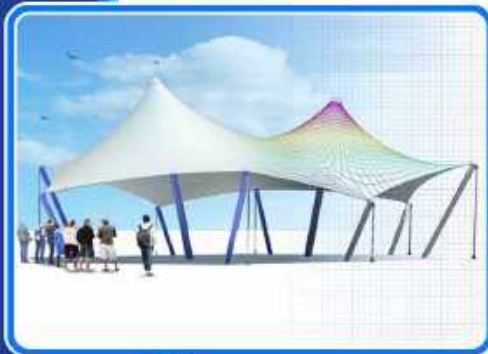

ENGINEERING - By using the latest industry standard FEA software, our specialist Engineers are able to accurately calculate tensile loadings and design posts, footings and support structure to suit each custom shade solution.

STRUCTURAL SUPPORT - Custom shade solutions can be supported by a range of structural systems including posts, brackets and custom framework. Steelwork can be hot dip galvanised, galvanised and powdercoated or epoxy painted depending on preference and location.

SHADE MANUFACTURE - Each custom shade is individually designed, patterned and plotted using the latest 3D design software. Once cut out, panels are machine sewn or high frequency welded depending on the fabric type. Extra heavy duty reinforcing, combined with lifetime warrantied sewing thread and quality fittings ensures that Shadeform's shades are the strongest on the market.

FITTINGS - By using only the highest quality grade 316 stainless steel edge wires, tension fittings and componentry, Shadeform are able to provide custom shade solutions that are both durable and dependable.

“from conceptual design and visualisation, through to manufacturing and final installation - a turnkey solution”

FABRICS - Shadeform offer a wide range of fabrics to suit the individual application. Commercial grade Shadecloths provide a durable yet economical solution, with woven polyester mesh and screen fabrics also available, with a wide range of colours and block out options. If a fully weatherproof solution is required, a range of high-grade waterproof PVC fabrics can be utilised.

WARRANTY - Modern fabrics are extremely durable and designed to withstand years of outdoor use exposed to the elements. Commercial grade Shadecloths have warranties of up to 15 years, with waterproof fabrics having warranties up to 20 years.

INSTALLATION - At Shadeform we have a team of fully trained installers capable of undertaking the construction of footings, installation of support structures, shade sails & membranes. Shadeform are fully licensed and accredited for construction work with years of experience working for Government, Councils, Schools and Commercial Clients.

MAINTENANCE - Shadeform's shade & all weather solutions will provide years of trouble free shading with minimal maintenance. If over the course of time maintenance or repair work is required, Shadeform have a team of installers on the road and a dedicated repair department capable of quickly responding to any issues if they arise. Shadeform are a Spotless and DPTI accredited contractor, and carry out repair work at numerous Government and School facilities.
