# RETRACTABLE ROOF SYSTEMS

*Ramsgate Hotel*

*The Moseley*

Outside areas often go unused in winter, as the rain and cold weather drives customers away. During summer months the sun can also create extreme temperatures, making outside areas too hot to enjoy. By installing a Retractable Roof System you can provide much needed sun and rain protection; and create wonderful outdoor areas to be enjoyed all-year round.

- **Transform outdoor areas**
- **Protect customers from sun and rain**
- **Add value to your Business**

Shadeform specialise in the largest and highest quality canopies on the market today. Armed with a local team of manufacturing and installation experts, Shadeform's most recent project was a massive 125m<sup>2</sup> Retractable Roof at the Coopers Ale House. Now a new standard has been set for retractable canopies - the possibilities for Bars, Restaurants, and Cafes are endless!
