Optional Vandal Deterring Overhang

## Engineer Design & Certification

All Shadeports are Engineer designed to comply with South Australian Building Codes and independently certified by a private certifier.

## 10 Year Structural Guarantee

The steel frames have a 10 year structural guarantee and are fabricated from corrosion resistant galvanised Australian Steel. Optional powder coating provides a colourful, tough and extremely durable finish.

## 98% UV-B Blockout Shadecloth

Contemporary Shadecloth fabrics are available in a wide range of striking colours providing up to 98% UV-B protection.

## Experience

Combined with our parent company 'Shadeform', we have over 45 years experience in the Shade industry. We are proud of the dependable reputation we have earned over the years and our accumulated knowledge ensures that our product is designed and installed to a high standard ensuring our product is robust, long lasting and trouble free.

## DECS

Shadeport framed canopies comply with the current DECS policy requirements for shade structures within Government Schools.

## Layout

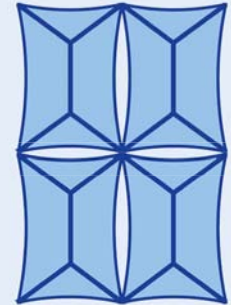

### Square or Rectangular

Square or rectangular format Shadeports are ideally suited for shading large areas with minimal posts. Frames can include rafter overhangs to reduce the risk of vandal damage.

### Linked Shadeports

Multiple Shadeports can be linked together to shade large areas, ideal for large playgrounds or assembly areas. Can be linked in line or multi-square format.

### Hexagonal Format

Hexagonal format Shadeports can provide shade over large areas with a striking and eye-catching structure. This configuration offers a perfect solution for areas that differ from standard shapes, allowing for more complicated lay outs.

## Applications

Shadeport canopies are suitable for a wide range of shading needs from small residential projects such as car shading, right up to large school playgrounds and commercial scale projects. Shadeport canopies are also available in kit form.
