

# ***COMMERCIAL SHADE STRUCTURES***

When it comes to outdoor weather protection, textile fabrics are unsurpassed in aesthetics and design. Shade sail structures and flexible canopies offer unique artistic features, not available with conventional building structures. Providing the perfect combination of both form and function, flexible membranes allow the creation of wonderful outdoor environments and weather protection all year round.

Shadeform have excelled at providing commercial shade solutions for over twenty five years. A refined project design and management system, allows Shadeform to deliver high quality Australian products at affordable prices. Extensive experience with local councils, along with Shadeform's team of experts, ensures a smooth and hassle free project from start to finish.

For more information, contact Shadeform's experienced staff to discuss your individual shading requirements.

# COMMERCIAL SHADE STRUCTURES

*Custom Design Shading*

## DESIGN

Shadeform have twenty five years of innovative design experience providing a full design service. From initial sketch concepts right through to complete shop drawings, we at Shadeform use the latest industry standard 2D and 3D design software. Engineering, Certification and Council Approval are extensively covered, ensuring a smooth development process.

*Flexshade Umbrellas*

## STRUCTURAL SUPPORT

Fabric membranes can span large distances without intermediate support structure used in conventional buildings. Steelwork can be galvanised, powdercoated or two pack painted to a choice of colours.

## SHADE & WATERPROOF MEMBRANE STRUCTURES

Membrane structures allow a design freedom not normally possible with traditional building materials. Shapes and layouts that would otherwise be impractical or difficult to accommodate are easily achieved with the flexibility of tensile membrane structures.

## WARRANTY

Shadeform offer a 5 year warranty on the manufacture and installation of all products. Fabrics have a 5-15 year warranty and approximate life span is 10-20.
